LEGAL BASIS OF PUBLIC ADMINISTRATION IN THE FIELD OF COMMUNICATIONS IN UKRAINE

In the article legal bases of public administration in the sphere of communication in Ukraine are considered. It was noted that the rapid development and spread of new technologies has a huge impact on various sectors of life and covers both social and economic spheres, as well as education, science, etc., and the activities of public institutions. It is emphasized that the modern process of globalization, which unites people from different continents in a single public space, has become possible primarily due to the development of communication facilities.

Attention is drawn to the fact that Ukraine has a rather extensive communication system, which consists, in particular, of radio communications, postal communications and telecommunications, each of which is designed not only to help realize the needs of citizens in communication and transmission / receipt of relevant information, but also to ensure the development of socio-economic, defense, foreign economic sphere of the country.

The analysis of international legal acts, as well as legislative and other normative legal acts of Ukraine in this sphere is carried out. It is grounded that one of the main legal acts in the field is the Law of Ukraine "On Telecommunications", which establishes the legal framework for activities in the field of communications on the territory of Ukraine, defines the powers of public authorities in the field of communications, as well as the rights and obligations of persons involved in this activity. It was noted that the legal basis for public administration in the field of communications in Ukraine is a set of acts of national and international law,

establishing generally binding rules and fixing the norms relating to the emergence and development of public relations subjects of public administration in this area.

It was concluded that today in Ukraine there is a large number of unsystematized normative acts, containing legal norms regulating public relations in the field of communications, and therefore the current state of legal regulation of public administration in the sphere of communications in Ukraine does not fully correspond to the realities and relevant international standards, because it contains a number of gaps and contradictions requiring elimination.

Keywords: communication, telecommunications, public administration, information, radio-frequency resource, legal basis.
