## RECONCEPTUALIZATION OF MIGRATION PROCESSES OF THE GLOBALIZATION AGE: POLITICAL AND LEGAL ASPECT

Paper studies theoretical issues of reconceptualization of modern migration processes, analyzes its features. Emphasis is placed on new forms and types of migration processes, taking into account the challenges and threats for globalization. The specifics of the transformation tendencies of the development of these processes are actualizeded, as well as the development of practical recommendations for the improvement of the migration policy in both international political space and Ukraine.

It was stated that regulation of migration processes at the macrolevel should become a significant component of the socio-economic policy of the states of the international apolitical space.

The task of managing migration, especially of its external forms, is not to erect barriers by introducing a system of restrictive measures that will prevent migrants from reaching developed countries, but rather through the respect to human rights and humane principles to manage the migration flows of the population, in particular, permanent migrants, labor migrants, intellectual migrants, women-migrants, taking into account the interests of donors and recipients. In other words, regulation of migration processes is not about restriction of freedom of choice, but about support in solving of this problem in each case within the framework that is appropriate for society and desirable for the individual.

Migration policy measures (especially at the regional level) are based on the available scientific, technical, organizational and financial means to achieve the ordering of the migration space and to take under control the migration processes.

At present, the issue of formation of a full-fledged complex of criminal-legal measures to counteract illegal migration is particularly relevant; the severity of economic sanctions against employers who employ illegal workers; formation of a single information space and labor market of the CIS countries; organization of an interaction of the Ministry of Internal Affairs of Ukraine with interested agencies of other countries on joint detection and termination of activity of criminal groups engaged in the organization of channels of illegal immigration.

**Keywords:** migration, transboundary migration, legitimate structures of migration, illegitimate actors of migration, globalization, sexual slavery, human traffic, woman migration.
